PROFESSIONAL PROFILE

Bachelor's degree in Informatics Engineering with over three years of experience in web development, holding roles as Full-Stack Developer, Web Developer, and IT Staff. Skilled in building modern web applications using Next.js, React.js, Express.js, PHP, CodeIgniter, JavaScript, MySQL, and REST APIs. Experienced in delivering corporate landing pages, payroll systems, inventory management applications, and other web-based solutions. Demonstrated ability to manage projects from planning through implementation by collaborating with cross-functional teams to deliver efficient, maintainable solutions. Successfully resolved complex technical challenges, integrated new technologies, and upheld rigorous development standards to ensure high-quality outcomes.

WORK EXPERIENCE

Web Developer — Freelance

Founder Developer Kilat | Lamongan, East Java

Januari 2022 - Present

- Initiated projects based on client briefs and designed applications using the Waterfall methodology and CI/CD practices. Conducted application testing and validation before delivering projects to clients.
- Developed e-commerce applications integrated with the Midtrans payment gateway.
- Developed various other web applications based on business and organizational requirements.
- Used React.js and Vue.js for frontend development and Laravel, CodeIgniter, and Express.js for backend development.

Full-Stack Developer — Contract, Remote

PT. Eintio Academic & Technology | Salatiga, Central Java

April 2026 – September 2026

- *Developed and implemented the company landing page using Next.js, with a focus on performance, responsiveness, and user experience.*
- *Worked closely with team to deliver several web solutions that meet business requirements, resulting in a 25% increase in project efficiency.*
- *Developed technical proposals, workflows, and project documentation that served as essential references, supporting application development and streamlining processes across several initiatives.*

Web Developer — Internship, Remote

CV. Caraka Abadi | Malang, East Java

February 2023 - May 2023

- Developed an Inventory Management application to digitize the company's inventory management processes.
- Built and implemented features for stock management, incoming and outgoing goods, and profit-and-loss calculations.
- Designed web-based workflows to streamline inventory recording and improve the efficiency of daily warehouse operations.
- Developed and integrated user interfaces for inventory-related processes using PHP, JavaScript, AJAX, CSS, and CodeIgniter.

IT STAFF — Contract

Silmi Fashion | Sugio, Lamongan, East Java

December 2022 – April 2023

- Developed a Payroll Management application to automate salary calculations based on attendance, overtime, leave, and other payroll components.
- Improved payroll calculation accuracy to approximately 99% compared with the previous spreadsheet-based process.
- Provided IT support by troubleshooting computer hardware, network issues, and other operational IT requirements.
- Coordinated with the HR and management teams to ensure the system met business requirements.
